

Quality Policy

Korea K Valve Corp. is a specialized manufacturer supplying high-performance butterfly valves for various industrial sectors, including shipbuilding, petrochemicals, semiconductors, and water treatment. The company places the highest value on product reliability and Quality and operates a Quality Management System (QMS) with Customer Satisfaction as its core objective.

Our Quality Policy, based on the ISO 9001 international standard, includes the following commitments:

"We strive to lead the valve industry in product and service quality to inspire our customers."

✦ **Compliance with standards and realization of Customer Satisfaction**

We strictly comply with all applicable Regulations and regulations and continuously strive to clearly understand and fulfill customer requirements.

✦ **Establishment of a safe and efficient work environment**

We proactively identify and eliminate or reduce risk factors to maintain a safe and efficient production environment.

✦ **Continuous Improvement**

Through enterprise-wide Continuous Improvement activities, we enhance process efficiency and improve Quality completeness.

✦ **Sharing and internalization of Quality Objectives**

All employees clearly understand Quality Objectives and criteria and actively communicate and educate to incorporate these into their work.

Korea K Valve Corp. maintains a Clean Production Environment and facilities and practices quality-focused management based on the trust of major shipyards and key domestic and overseas customers. Management shares this policy with customers, employees, partners, and stakeholders, and commits to continuously developing the Quality Management System (QMS) through regular reviews and improvements.
